

A top-down view of a wooden desk. A person's hands, wearing a dark suit, are visible. One hand holds a pen and points to a 'Trading Graph' on a document. The graph shows a line chart with an upward trend. Other documents on the desk include one with a pie chart showing 'Investment' (50%), 'Stocks' (30%), and 'Int...' (15%), and another with a 'Current financial situation' section. A laptop is partially visible in the upper right. In the bottom left, there is a spiral-bound calendar with a date marker for 'Today's meeting' on the 5th and a note 'Dinner with family 5:15 pm' on the 6th.
